## Welcome

On behalf of the South Asian Society of Sexual Medicine and the Organizing Committee, it is our great pleasure to welcome you with our cordial invitation to the midterm symposium of SASSM to be held on April 12, 2014 at DMCH Ludhiana.

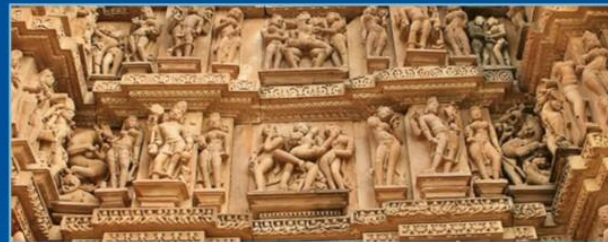

Modern Andrology has revolutionized the treatment of male reproductive disorders taking it away from realms of quacks and unqualified healers. Over the years new set of investigative modalities have modified diagnosis and treatment of male sexual health.

The theme of this Symposium is “**New Frontiers in Andrology**”, exploring the profundity and diversity of the contributing factors to men’s fertility and sexuality.

The scientific programme has been designed for participants who deal or have an interest in male reproductive health. It encompasses various aspects of male sexuality like erectile dysfunction, male infertility, ART and andropause. A live surgical workshop has also been planned. Workshop by eminent sexologists to guide participants in better understanding of male sexual disorders is on the programme.

Leading speakers in the field of andrology, from around the country would be participating in the symposium. Dr. Rupin Shah President, SASSM would be a key note speaker. We hope that after the symposium participants would learn new content which empowers them for better clinical care.

We would request you to mark your calendars for the academic feast. The organizing committee is looking forward to welcome you at Ludhiana and assure you of a memorable academic programme which will update you with the latest in field.

*Do not miss the meeting.  
Looking forward to see you in  
April 2014*

*With Best Wishes*
